EDUCATION

PRESIDENT UNIVERSITY — B.Sc. in Informatics, Artificial Intelligence Concentration Sep 2024 – Present
Cikarang, Indonesia | GPA: 3.93/4.00 | JABABEKA Scholarship Awardee 2024
Relevant Coursework: OOP, Data Structures & Algorithms, Database Systems, Artificial Intelligence, NLP

EXPERIENCE

INTERNSHIP & CAREER CENTER (ICC), PRESIDENT UNIVERSITY — Talent Acquisition Nov 2025 – Dec 2025

- Reviewed 1,000+ student resumes against career-readiness standards, identifying improvements in content, structure, and presentation for internship and job applications.
- Evaluated student projects, achievements, and experiences to assess candidate qualifications against ICC resume standards.

PROJECTS

CAREERTRACK — Job Application Tracker and Skill Matching Platform | Project Owner & Frontend Developer

React, TypeScript

- Developed a responsive personal platform for tracking job applications, recruitment stages, deadlines, follow-ups, and career insights.
- Built and customized reusable React and TypeScript components for application management, search, filtering, and analytics.
- Currently developing database integration and skill matching to compare job requirements with user profiles.

BRAINFOCUS AI — AI-Powered Study Productivity Platform | Computer Vision Developer

Python, Computer Vision, Face Recognition, Git

- Developed a facial recognition prototype using collected face datasets for multi-user recognition and identification of previously unseen faces.
- Integrated the computer vision workflow from a Google Colab prototype into the web application.
- Introduced Git-based collaboration by creating and managing the team repository and supporting feature integration and code merging.

CALORIEVISION — Real-Time Food Detection & Nutrition Application | Backend & Integration Developer

Python, FastAPI, YOLOv8, React, TypeScript

- Developed backend logic to automatically aggregate calorie estimates for multiple foods detected by the application.
- Integrated YOLOv8 detection outputs into the application flow for Live Mode and real-time detection results.
- Contributed to dataset collection and annotation while managing the repository and supporting feature integration and code merging.

PACKWISE AI — Packaging Recommendation System | ML Recommendation Developer

Python, Machine Learning, Random Forest, XGBoost, Supabase

- Designed a packaging recommendation pipeline and trained Random Forest and XGBoost models using structured product and attachment data.
- Evaluated recommendation models using accuracy, precision, recall, F1-score, and confusion matrices.
- Developed a separate rule-based recommendation prototype to support recommendation scenario generation and model development.

LEADERSHIP

KMB ASHOKAVARDHANA, PRESIDENT UNIVERSITY — Vice Chairperson 2025 – Present

- Coordinated cross-functional teams and external communication with sponsors and partner organizations while supporting event execution and organizational operations.

TECHNICAL SKILLS

Languages : JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Frontend : React
Backend & APIs : FastAPI, REST APIs
Databases : PostgreSQL, MySQL, Supabase
AI & Data : Machine Learning, Computer Vision, YOLOv8, NLP
Tools : Git, GitHub, VS Code, Google Colab, Vercel

CERTIFICATIONS

Dicoding — Front-End Web Development for Beginners | Dicoding — JavaScript Programming Fundamentals |
Dicoding — DevOps Fundamentals | BNSP — Junior Network Administrator
